

awarded Collbran the Engineering Inspiration Award for their ability to inspire other competitors.

The students and staff at the Collbran Job Corps certainly live up to their mission statement: "Believe, Achieve, and Succeed." Their first place victory at the Denver regional competition and excellent showing and award at the International Robotics Competition demonstrates that Collbran is meeting and excelling above and beyond this mission statement.

Collbran Job Corps students are well known throughout western Colorado for their achievements and commitment to the betterment of their community. They have actively been involved in community projects that utilized the skills of students in the construction trades, including the CISCO Networking Program, business technology occupations, as well as those in culinary arts training. The long-standing sense of commitment to enhancing community spirit and outreach serves as a benchmark to other Job Corps sites throughout the country.

Recently, the Department of Labor national Office of Job Corps selected Collbran Job Corps as a Career Success Standards, CSS, Pilot Center and national trainer. The CSS sets a standard for behavioral expectations of students participating in the Job Corps program in support of the President's High Growth Training Initiative. The Collbran Center was selected as a result of their outstanding core values, positive and engaging student culture, and consistent high performance.

Collbran Job Corps highlights the positive impacts the Job Corps opportunity has had on the lives of the disadvantaged youth who participate and the positive effect those youth contribute back to their communities and the strong values of community. As the budget and appropriations process proceeds, I hope the Senate will continue to support the Job Corps program and keep the wonderful example of Collbran Job Corps in mind. I know I will.

I commend the Collbran Job Corps Center for believing, achieving, and succeeding.●

#### TRIBUTE TO WILLIAM "J" THOMPSON

● Mr. PRYOR. Mr. President, it is with the greatest pleasure that I rise today to honor William "J" Thompson of Highland, AR. J Thompson works as a lineman for the Southern Electric Cooperative, and since 2004, he has also been a first responder and truck captain for the Highland Volunteer Fire Department.

On Christmas Eve, 2005, J Thompson responded to an emergency call from the Highland Police Department. A young man had been stopped by a police officer and had admitted to taking several tranquilizers. Shortly there-

after, he lost consciousness and was unresponsive to the officer. When Mr. Thompson arrived on the scene, the young man had stopped breathing. He was pulled from the vehicle, and it was discovered that he had no pulse. At this point, Mr. Thompson administered CPR, and the individual started breathing and regained a pulse.

Without the heroic actions of J Thompson, this young man would not be alive today. My home State of Arkansas is fortunate to have men of his caliber volunteering their time and expertise to their communities.

Mr. President, I ask my colleagues to join me in applauding William "J" Thompson and all the remarkable volunteer firemen for their selfless commitment to safety and humanitarian efforts in our country.●

#### IN MEMORIAM: ROBERT L. DUVALL, III

● Mr. BOND. Mr. President, I take this opportunity to honor the life of Bob Duvall, not only out of great respect for his contributions to technology advancements in the defense industry but also for all of those who have played a key role in the strength of our Armed Forces and Nation's security. Warfighters and commanders among all service groups have directly benefited from his engineering contributions. Mr. Duvall passed away on May 24, 2006. He was 61.

Mr. Robert L. Duvall, III, was born in Cheverly, MD, on October 8, 1944 and grew up in the suburbs of Washington, DC. His father was an electrical engineer for the Chesapeake and Potomac Telephone Company and inspired him to pursue a career in engineering. In 1967, he graduated from Cornell University, Ithaca, NY, with a degree in electrical engineering and subsequently went to work at Hughes Aircraft Company in California. Mr. Duvall furthered his education with a master's degree in electrical engineering from the University of Southern California in 1975.

After Mr. Duvall's placement within the defense industry, his technical expertise expanded to include a variety of disciplines, including circuit design, optics, infrared technology, optoelectronics, and systems integration. It was within the infrared technology and laser systems integration sector that his contributions made the most notable and recognized impact to the military capability of the United States. Early contributions and developments during his 20-plus years with Hughes Aircraft led to innovation in Naval and Air Force laser pointing and tracking technology. His contributions are better known for supporting the U.S. Army's Second Generation Forward Looking Infrared, FLIR, developments in the early 1990s.

Mr. Duvall's pioneering efforts with Hughes Aircraft and subsequently his current position as vice president of advanced technology at DRS Tech-

nologies have indeed made a difference for our present generation of warfighters. Our sons and daughters enter into battle with the decisive ability to "own the night" and precisely target and defeat the threat because of the incredible contribution he made as a member of our defense industry. There is no doubt Mr. Duvall contributed directly to the saving of many lives and the avoidance of great loss because of his efforts and expertise.

Mr. Duvall is survived by his wife Shirley and his two children Mark and Michelle. Their loss should not be felt alone and should not be remembered alone. It is indeed with great respect and admiration for his contribution to our Nation's defense that we pause today to recognize Mr. Robert L. Duvall, III. His effort will have a lasting effect on many, and no doubt others lives will continue because of him.●
